Career Objective

Seeking a professional work environment that enables me to apply my academic knowledge and technical skills while leveraging modern technologies to improve business efficiency. Equipped with skills in data analysis database management, and web development, with the ability to contribute to the development of digital solutions that support organizations and enhance the quality of decision-making.

Education

Bachelor of Business Administration in Management Information Systems (MIS) 2022 – 2026

GPA: 4.90/5| First Class Honors

PROFESSIONAL EXPERIENCE

Prince Sultan Armed Forces Hospital | Madinah

Cooperative Training | June – August 2026

- Worked with electronic administrative systems, monitored transaction workflows, and documented related procedures.
- Reviewed and entered data using Microsoft Excel, verifying its accuracy and completeness and organizing it to ensure data quality.
- Analyzed administrative data, extracted key indicators and findings, and transformed data into tables and charts to clarify information and support decision-making.
- Reviewed administrative workflows, analyzed process steps, contributed to identifying improvement opportunities, and proposed solutions to enhance process efficiency and reduce manual work.

Projects

School Database Design

- Designing an ERD diagram and creating a database using SQL to organize and manage school data efficiently.

Data Analysis of Real Estate Transactions in the Kingdom of Saudi Arabia for the First Quarter of 2025

- Collecting and cleaning data using Excel.
- Creating interactive dashboards through Power BI to provide a comprehensive view of the real. estate market and support decision-making.

Taibah Journey Website Design

- Developing a website dedicated to visitors of Al Madinah Al Munawwarah to discover historical and religious sites.
- Adding an online booking feature and providing comprehensive information about the most prominent tourist attractions.

ChemAware — Intelligent Chemical Safety System | First Place Winner in the Digital Innovation and Artificial Intelligence Program

- Designed and developed an integrated system connecting a sensor device to a digital application to monitor exposure to chemicals and gases, generate alerts, and analyze exposure data.
- Developed the application interfaces, alert system, analytics features, and AI-powered assistant.
- Applied artificial intelligence technologies to analyze exposure data and provide relevant safety information and guidance.

Courses & Certifications

- Data Analysis Bootcamp — Hash Plus Platform (May 2025)
- Artificial Intelligence Fundamentals with an Applied Project — IBM (March 2025)
- Introduction to Modern Artificial Intelligence — Cisco Networking Academy (February 2025)

Technical Skills		Soft Skills
• Database Design	• Microsoft Excel	• Leadership
• Data Analysis and Data Processing	• Power BI	• Problem Solving
• Web Interface Development	• SQL	• Time Management
• Interactive Dashboard Creation	• HTML, CSS & JavaScript	• Teamwork
• Database Management	• Microsoft PowerPoint	• Attention to Detail
		• Continuous Learning
